

CHESTER ENGINEERS

RAILROAD INDUSTRY

CHESTER ENGINEERS is able to offer it's customers and business partners "Leading edge technology", "Innovative water, wastewater, and air quality management solutions", and "Cost reduction services".

■ Capabilities and Experience In Industry

- Treatability Studies
- Feasibility
- Master Planning
- Design
- Design - Build (DB)
- Design - Build - Operate (DBO)
- Equipment Procurement
- Construction Management
- Program Management
- Commissioning and Start-up
- Asset, Material, Computer Information and Data Management

■ Air, Waste, Water, Utilities Solutions

□ Air

- Air Dispersion Modeling
- Air Sampling and Testing
- Ambient Monitoring
- Pollution Prevention studies
- Meteorology
- Air Emissions and Scrubber Troubleshooting
- Engineering studies (BACT, RACT, LAER)
- Title V Permitting

□ Water

- Industrial Water studies
- Storm Sewer Overflow studies and design
- NPDES permitting
- SPCC plans
- Required sampling and testing for NPDES permits

□ Waste Water

- Waste identification and characterization
- Batch Treatment
- Recycle and Recovery studies
- Biological, Physical-Chemical, and Passive Treatment design
- Site Remediation studies
- Asset Management Program / Upgrades
- Oil / Grease / Water Separation
- Coal Pile Runoff

□ Utilities

- Central Utility Complex
- Central Utility Plant
