

# CHESTER ENGINEERS

## CAPABILITIES AND EXPERIENCE IN THE STEEL INDUSTRY

*CHESTER ENGINEERS has the capability to provide Environment Management Consolidation Services which would include the following on a "One Stop Shop" basis.*

### **Air**

- Air Dispersion Modeling
- Air Sampling and Testing
- Ambient Monitoring
- Pollution Prevention studies
- Meteorology
- Air Emissions and Scrubber Troubleshooting
- Engineering studies (BACT, RACT, LAER)
- Title V Permitting

### **Water**

- Industrial Water studies
- Industrial Wastewater and Passive Treatment studies
- Biological, Physical-Chemical, and Passive Treatment design
- Storm Sewer Overflow studies and design
- NPDES permitting
- SPCC plans
- Required sampling and testing for NPDES permits

### **Waste**

- Waste identification and characterization
- Recycle and Recovery studies
- Site Remediation studies
- Waste Management

### **Engineering**

- Railroad engineering including fueling stations
- Civil Engineering including infrastructure planning and design
- Acquisition environmental due-diligence

### **Information Management**

- System development for managing all environmental data and reports for regulatory agencies
- Industrial GIS applications

260 Airside Drive, Airside Business Park  
Moon Township, Pennsylvania 15108
