

CHESTER ENGINEERS

POWER / UTILITIES INDUSTRY

CHESTER ENGINEERS is able to offer it's customers and business partners "Leading edge technology", "Innovative water, waste, and air solutions", and "Cost reduction services".

■ Capabilities and Experience In Industry

- Treatability Studies
- Feasibility
- Design
- Design - Build (DB)
- Design - Build - Operate (DBO)
- Equipment Procurement
- Construction Management
- Program Management
- Commissioning and Start-up
- Asset, Material, Computer Information and Data Management

■ Air, Waste, Water Solutions

□ Air

- Air Dispersion Modeling
- Air Sampling and Testing
- Ambient Monitoring
- Pollution Prevention studies
- Meteorology
- Air Emissions and Scrubber Troubleshooting
- Engineering studies (BACT, RACT, LAER)
- Title V Permitting

□ Waste

- Waste identification and characterization
- Recycle and Recovery studies
- Site Remediation studies
- Waste Management

□ Water

- Industrial Water studies
- Industrial Wastewater and Passive Treatment studies
- Biological, Physical-Chemical, and Passive Treatment design
- Storm Sewer Overflow studies and design
- NPDES permitting
- SPCC plans
- Required sampling and testing for NPDES permits

260 Airside Drive, Airside Business Park
